PRESS RELEASE

Serendipity Megarip 9.1 announced

SYDNEY, Australia – September 5th, 2024 – Serendipity Software today announced version 9.1 of Megarip, a major update to the software that includes many new features and enhancements of benefit to new and existing customers alike.

"Megarip version 9.1 introduces a dongle-free licensing option for new purchases allowing it to run in the cloud" said Peter Skarpetis, Serendipity Software's Chief Executive Officer.

Megarip version 9.1 uses the latest hashing algorithms for storing user passwords, improving overall account security.

Megarip version 9.1 now runs on Linux systems with FIPS mode activated, ensuring it operates in the most secure environments.

Megarip version 9.1 adds support for the EPSON SC-F6400 / SC-F6430 / SC-F6440 / SC-F6450 / SC-F6460 / SC-F6470 WITH EPSON PRECISION DOT printer series.

Megarip version 9.1 adds support for the EPSON SC-F6400H / SC-F6430H / SC-F6440H / SC-F6450H / SC-F6460H / SC-F6470H WITH EPSON PRECISION DOT printer series.

Megarip version 9.1 adds support for the EPSON SC-P20500 / SC-P20530 / SC-P20540 / SC-P20560 / SC-P20570 / SC-P20580 WITH EPSON PRECISION DOT printer series.

For more information on the new features and enhancements in Serendipity Megarip 9.1 see the release notes, available on the Serendipity Software website.
